

Mr. Meanbottom and the assault of the 1MHz computer and the comeback of the nerds.

This story takes place at the school for the nerds. And in this school there is 2 computers' a 1 MHz that has not been used in years because the school had a new 500 MHz computer. The old computer was in classroom 13. Now let me tell you something about this school, years ago a kid went crazy in room 13 and he has never been the same ever since some say he went crazy because a teacher gave him as a punishment a 1,000,000 page essay on doors. Now this kid new about doors but 1 mil. Pages! That is a little too much.

Now you know about the past.

Mr. Meanbottom was a teacher and he was as mean as they come 100,000 word essays on spoons and other boring stuff if your pencil tip brakes you have to make the 1 MHz computer to work (The best computer fixer ever could not make it work) His

favorite thing to do was to get kids in trouble. The nerd school only hired him because the works for free only thing he wants is to make kids mad at him.

In the meantime the old, old, old computer was mad at every body because they never used him unless the kids got in trouble (That happened often) and that was no fun so he won't use his monitor.

Mr. Meanbottom was having a bad day all of the kids were good nobody did anything wrong so he got a kid in trouble for raising his hand 'But I didn't do anything' '

'So"?'

'Well you aren't fair'

'So'?

'You are mean'
'I don't care'

Mr. Meanbottom did this all time and the headmaster know about this but he was a teacher for free and the school was on a budget (They only had \$77.98 a year to spend)

This is the desk the 1Mhz computer is on in room 13. Mr. Meanbottom has to move to room 13 the two worst personates in the school in the same room with 30 nerds.

Mr. Meanbottom started the 1MHz computer Monday morning and the screen worked and the computer had a program called "Mean & Meaner software presents how to take over nerd schools."

"Just what I'am looking for"

Later,

Mr. Meanbottom was starting the computer it gave him this screen:

'What the hey!!'

He clicked on the Help key and it gave him this

screen:

You should know this you jerk you have a owners booklet if you get in this file again this computer will blow up. Now the mean guy somehow understood that gibberish and got a plan.

Now when the kids came in Mr. Meanbottom gave them lollypops (They had sleeping stuff on them) and gave them all A+ for the day.

Later the kids all were asleep and now with the kids out of the way he gave the headmaster a forgetting potion and he took over the school but by then the kids woke up and started worrying

throe "All you kids I toke over the school you will listen to ME"

Now the kids were nerds but even nerds were smart and they got some potion of I.Q. lessening and gave Mr. Meanbottom some and he became dumb then they gave the headmaster a kick and he woke up. Later they had a feast of roast doors and fried 1MHz computers.

The end (Or is it?)

Look for mr. Meanbottom the 2nt
bo
